

## Managing Students with KeepnTrack

Managing the information and paperwork for student activities, early dismissals and late arrivals until now has been extremely time consuming and prone to errors and omissions.

KeepnTrack provides the following student tracking and reporting capabilities:

- Tracks and reports early student dismissals and the explanation, such as doctor or dentist appointments.
- Tracks late arrivals and prints out tardy slips. Provides accurate and instant reports on tardy records by student and by variable date ranges.
- Tracks who is and is not authorized to check a student out and for what reasons.
- Know which students are on campus at any given time.
- In a case of an emergency, know immediately which students have left due to an early dismissal and are no longer on the campus.
- Tracks student activities such as field trips.
- Provides staff with necessary student information, such as medical conditions, allergies or special instructions.
- Records are stored off-site, insuring integrity and availability of data under any circumstance.
- KeepnTrack is surprisingly affordable and easy to use.

The screenshots illustrate the user flow: 1. Select Person, 2. Select Activity, 3. Verify. The interface includes a large 'K' logo, a 'Continue' button, and a 'Start Over' button. The activity selection screen lists options like Assembly, Club, Community Service, Computer Lab, Detention, Sports, and Study Hall. The final screenshot shows a printed badge for Darla Anderson, a student at KeepnTrack High School, with a barcode, ID number 6601, and activity details for Study Hall on 2007-Apr-27 at 4:10pm.
