

## Improving Safety by Keeping Track of Visitors

Avoid the hassles and errors of manually signing in and out visitors. KeepnTrack saves time and money in 3 easy steps.

- Step One—Enter the visitor's name and date of birth. The visitor's name is then checked against the federal sex offender database. If a positive match is found, entry is denied and notification is sent to onsite staff and local law enforcement.

- Step Two—Select the reason for the visit. The visitor is then presented with several school activities and asked to state the purpose of their visit. These records are then kept so the school can view who has visited the campus and what time they were there.

- Step Three—Print the visitor's ID badge. The visitor's badge is yellow in color so it cannot be copied. It shows the visitor's name, where the visitor going and the date and time the visitor checked in.

KeepnTrack system is surprisingly affordable, easy to use and install, and requires minimal hardware.
